

BUMBO BABY SEAT Child Restraint Belt Assembly Instruction Manual

Your assembly kit contains:

1 x Attachment point Template:

1 x Child restraint belt with A, B, and C anchors:

Keep restraint belt buckled during installation.

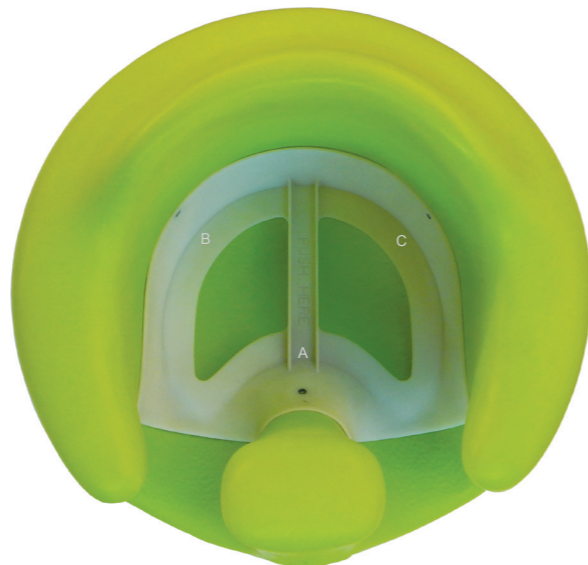

3 x Anchor pin washers:

You will need a pen or permanent marker to mark the attachment points on the seat.

STEP 1. Mark the attachment points:

1.1 Place the template into the seating surface and push down to a snug fit. Verify that the template is in contact with the seat along the entire template edge.

1.2 Mark the 3 attachment points with a pen through the holes indicated by A, B, and C on the template.

STEP 2. Attach the child restraint belt:

2.1 Do not take the belt apart before installation.

2.2 Place the point of the red anchor against the mark you made for point A, then press through the seat.

2.3 Turn the seat upside down and push the washer, flat end first, over the sharp point of the anchor until it clicks into place.

2.4 Repeat steps 2.2 through 2.3 for remaining anchors and washers.

2.5 Tug firmly on the restraint to make sure that all anchors are secured after the washers have been attached.

⚠ WARNING

When not buckled in seat, children can escape and fall suddenly.

To avoid serious injury from falls and other hazards:

- Always use with the restraint belt.
- Only use the Seat on floor or level ground surface.
- Never use on raised surfaces such as tables, counters, chairs, beds, or near stairs. Even a belted baby can cause the Bumbo seat to slide or move off raised surfaces.
- Always stay with and watch your baby during use.
- Never use as a booster seat, high chair, car seat, bath seat, or child carrier.
- Never use the Bumbo seat in or near water to avoid drowning.

Read the manual before use. For additional information, see www.bumbo.com
